

Clean Hands Pledge

I am dedicated to the quality care and safety of my patients and their families.

I am committed to the health and well-being of my team members.

I pledge to do my part to minimize infection due to hand contamination by cleaning my hands with sanitizer or soap and water:

Before and after patient contact

After contact with blood, body fluids or contaminated surfaces

Before invasive procedures

Before and after removing gloves

After restroom use

I understand that according to the CDC, wearing gloves is not enough to prevent the transmission of pathogens in health care settings.

The well-being of our patients, my team members, me and my family is worth the extra effort!
